

## Ink Technologies

## SOLVENT INK

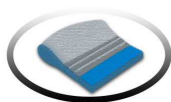

- **Aspect**  
Matte satin finish
- **Applications**  
Glued poster 4m x 3m, paper, cardboard
- **Major advantages**  
Good stability and quality of point. Fast drying time, no dilution
- **Printing**  
Automatic and semi-automatic machines

### TECHNICAL CHARACTERISTICS

**Screens**

Fabrics: mesh 120 threads/cm.  
Reports: emulsions and films must be solvent resistant

**Squeegees**

Polyurethane 65 SH (Soft)

**Coverage**

With a 120 threads/cm fabric, 1 kg will approximately cover 55 to 65 m<sup>2</sup>

**Dilution**

No dilution. Viscosity ink employed with 120 T mesh.  
ST002-Base thixo allowing optical densities adjustments of quadrichromic colors.

**Cleaning**

Cleaning with the solvent 77BIO, 77NETX1 or X1SE is recommended

**Packaging**

SATELLITE 20 kg

**Storage**

One year in its original packaging stored in between + 5°C and + 35°C

**Adhesion / resistance**

Printability of 4 x 3 m.  
Resistant to bad weather and light for outdoor displays for a duration of 2 to 3 weeks

**Drying**

Few seconds at 40/45°C in a hot air tunnel.  
In case of heavy load printing, control the drying process at the exit of the tunnel

**Handling**

After extraction of the ink, open pots need to be promptly closed back to prevent any contamination or dust. The viscosity can be altered following solvent evaporation and will have an impact on the ink properties

**Hygiene and safety**

Although the products selected for the formulation are not dangerous as such, contact can cause allergic reactions in some particularly sensitive individuals. Ink soils on the skin should be cleaned as soon as possible with soapy water. In any case, refer directly to the safety sheets

#### Guarantee reserves
